

Compliant to US Military specifications for command post lighting, these highly specialized lights provide the highest level of performance and efficiency. By utilizing high intensity low glare white and red LEDs, on two separate internal platforms, using high-performance power supplies and light engines, A and A Logistics provides unparalleled lighting solutions for the harshest environments.

Available in Red, Blue or Green

Features & Benefits

- Proprietary highly efficient light engines / Consumes less energy
- Proprietary optical designs maximize optical efficiency
- Light level stays the same / Does not degrade like fluorescent bulbs
- Runs cool / Generates minimal heat
- LEDs do not have filaments / Vibration breaks fluorescent filaments
- Auto-sensing input voltage ranging from 110-240VAC, 50-60HZ
- Multiple mounting options / Hanging kit included
- Molded features in each end cap for tethered applications
- Stringable up to 35 lights on standard 10 amp circuit
- Brighter than competitor's 30 inch light
- Individually switchable from white to red
- No maintenance required
- IP 66 rated for damp locations
- No RF emission, requires no faraday shielding
- Emits no IR or UV
- Light contains no mercury (Green)
- High impact lens
- Ridged T-Slot for fixed mounting option

Light Hanger with S-Biner and pouch

S-Biner Shown on 4 Hole End Cap

Container Light with EURO Plug

Specifications

Weight	— 1.13kg (2.5lbs)	Max Wattage	— 30 watts (white only)
Size	— 24"L x 2.75" dia	EMI emissions-None	— Filter not required
Rated hours	— 50,000 hours	UV/IR emissions-None	— Filter not required
Temp Range	— -50c to +50c	Total Lumen Output	— ~2800 White/~610 Red
Input voltage	— 110-240VAC	All Weather	— IP66
